

PC12-NSD

PC12-NSD – Our Most Affordable Powered Cylinder

The original SVS subwoofer was a cylinder design, and this unique and elegant form factor has since become an iconic symbol of SVS performance heritage. The PC12-NSD is our most affordable powered cylinder, but after experiencing its performance, no one would dare call it 'entry level'. Every component reflects SVS performance pedigree, and the PC12-NSD obliterates over-priced and under-performing brick & mortar subwoofers, even at twice the price. Prepare to be pleasantly shocked at what the PC12-NSD will bring to your music and home theater system – bass so accurate, detailed, dynamic, and deep that after one listen your old 'subwoofer' will be kicked to the curb.

Specifications:

- Down-firing NSD12" Driver with integral base plate
- STA-400D Sledge, 400 watt amplifier
- Top-firing 4" high-flow flared port
- High-grade black fabric exterior cover
- Protective non-resonant steel mesh grille
- Extremely rigid and strong cylinder enclosure
- 18-130 Hz +/- 3 dB
- Dims: 35-3/4" (H), 16-5/8" (OD)
- Weight: 59 pounds

PC12-NSD

Compact Footprint, Efficient Performance

With only a 16.5" diameter footprint, the PC12-NSD will fit into almost any location, and no other subwoofer design offers more bass performance per square inch of floor space. Using vertical height to achieve a generous enclosure volume and a deep-tuned port, the result is excellent deep bass performance and outstanding mid-bass slam – all in a very manageable size. Finished in high-grade black velour fabric, this unique and elegant subwoofer will complement the most upscale décors and high-end theaters.

"This sub is excellent for music and an absolute beast for movies... my PC12-NSD performs as well as the best of them for music playback, but with its deep extension and enormous output it sends them all home tail-tucked when it's time for home theater."

-Gordon D.

Customer Review, svsound.com, 2012

NSD12 Driver – Best In Class Performance

- FEA-optimized motor with dual shorting rings and pole extenders to reduce gap induction and distortion.
- 2" diameter, high-power voice coil with high-temp GSV former.
- Nomex linear-roll super long-throw spider.
- Exclusive SVS aluminum cone and composite dust cap for excellent transient response and resonance control.

Sledge Amplification – Intelligent and Sophisticated Power

- 400 watts of efficient, Class D power with 'green' standby mode.
- Stereo line-level RCA I/O connections.
- Separate high-passed and unfiltered line level outputs.
- Continuously variable low pass filter.
- DSP control for refined behavior under all operating conditions.
